## **IT ENABLED LEARNING**

The COVID-19 pandemic triggered the Indian Education Sector to shift dramatically to virtual mode of teaching and learning using various Information and Communication Technology (ICT) tools. This has led to radical acceleration in the pace and urgency of various ongoing technology-driven educational initiatives. The crisis has helped in the stimulation of innovation in the education field. This global crisis has reiterated the potential of ICT in enabling the goal of education access and quality for all children, though the accessibility of the same is still an issue in major parts of the country.

At Mithibai College, we envisage our moto 'Higher still and higher' and have empowered the education, for the advantages of the major stake-holders through intensive use of ICT. Many innovative pedagogical tools have been developed in 2020-21, and are hereafter listed below:

### **1) MS Teams for conduct of teaching learning:**

The online lectures were conducted for the academic year 2020-21, using the MS Teams platform. All the students have been provided with Microsoft email ids. The same was used for joining lectures on respective teams. The faculty used multiple pedagogical tools for the teaching learning process, including use of power point presentations, videos, online e-resources, live sessions, flip classrooms, and many more. To increase the interaction during the lectures again the faculty used live quizzes on free platforms as mentimeter, kahoot, quiz pedia, Socrative, survey monkey, quizlet, Prezi, Peardeck, and more. Applications as Padlet, Polly, etc were used to make the class participative.

The use of this platform was also made to-

- a) conduct of practical sessions using animated videos, stimulation software's, actual videos of experiments conducted by faculty as well as virtual labs.
- b) Online research projects wherein the same is part of the curriculum.
- c) record attendance, as at Mithibai college 75% attendance is mandatory.
- d) Students' feedback and Students Satisfaction survey

### **2) Learning Management System (LMS)**

The management of the college has established as inhouse LMS- the students portal. It enables the faculties to upload academic calendar, online and e-content that is required for teaching learning. With LMS, students may refer to the course content outside the classroom and prepare in a much better way.

The LMS is also the platform to post all student related notices. The announcement of their results of continuous assessment as well as term end examination is through this portal, and thus is personalized for every student.

### **3) Examination and Evaluation**

The examination and evaluation are the robust pillar of an education system. At Mithibai, special emphasis is given on the same. For the undergraduate programs, online objective examination papers were a modality for examination. The questions as well as the answers were shuffled. Further, all questions were prepared as per Blooms and Andersons taxonomy and graded under three categories, viz- easy (20%), moderate (40%) and difficult (40%).

For post-graduate programs the examination, the questions were subjective and within the permitted time, the students were to upload the answer books. The process of evaluation as well as moderation was online.

### **4) Capacity building**

The faculty as well as the students engaged in enriching their skills through multiple webinars wherein they participated. The students of the college under the guidance of students developed holistic persona through the conduct of -

- a) International college festival - Kshitij as well as departmental festivals
- b) Online annual day.

**Compare lung sizes of Indian and US children, you'll know who air pollution affects most**  
In 'Breathing Here Is Injurious To Your Health', Jyoti Pande writes about why air pollution has become a public health emergency in India.

## 2) Documentaries on the influence of Social Media on youth

The screenshot displays a Microsoft Teams meeting window. On the left is a navigation pane with icons for Activity (37), Chat (3), Teams, Assignments, Calendar, Calls, Files, and Help. The main content area shows a meeting titled "F.Y.B.A Div-B Sociology" with a "General" channel. A YouTube video is playing, titled "The Social Dilemma | Full Feature | Netflix" with a duration of 01:33:42 and 874.1K views. The video thumbnail shows a person in bed with a smartphone, with the text "NETFLIX FULL FEATURE" overlaid. Below the video, a "New conversation" button is visible. The Windows taskbar at the bottom shows the search bar, task view, and various application icons, along with system information: 34°C, Smoke, and the date 23-Oct-21 at 12:57 PM.

 **MISRI NAGDA - 40310210339** 14-Oct 7:46 AM  
ma'am the negative aspect of social media is very greatly explained in the documentary called the social dilemma that we talked about in the last lecture

 **SHREVA KADAM - 40310210207** 14-Oct 7:50 AM  
Also many news and articles are shared on the social media first so many get to know about news by this instead of news

So we get to know more about it by online instead of we watching it on news

The U.S. Department of Energy National Virtual Biotechnology Laboratory (NVBL) is a consortium of DOE National laboratories, each with core capabilities relevant to the threats posed by COVID-19. The NVBL is taking advantage of DOE user facilities, including light and neutron sources, nanoscale science centers, sequencing and bio-

## Isolation of Chloroplast

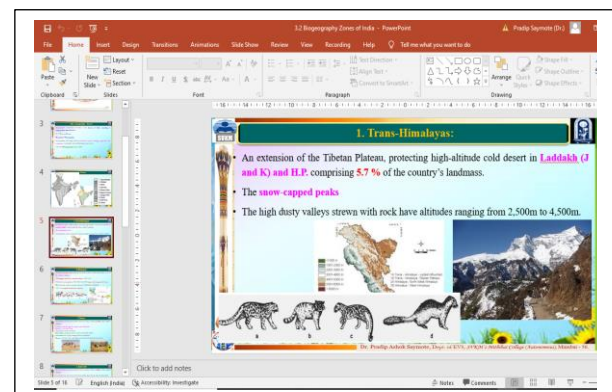

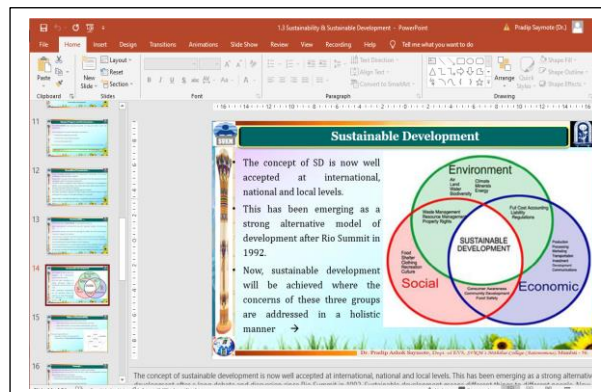

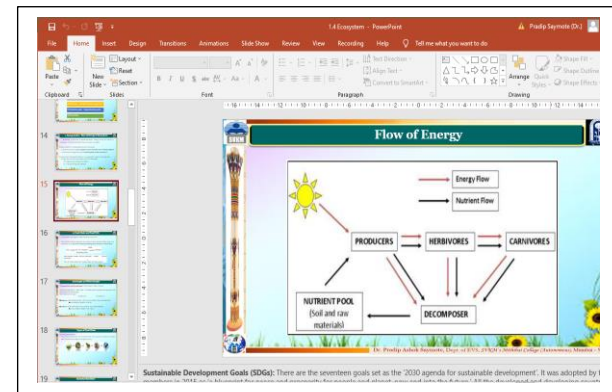

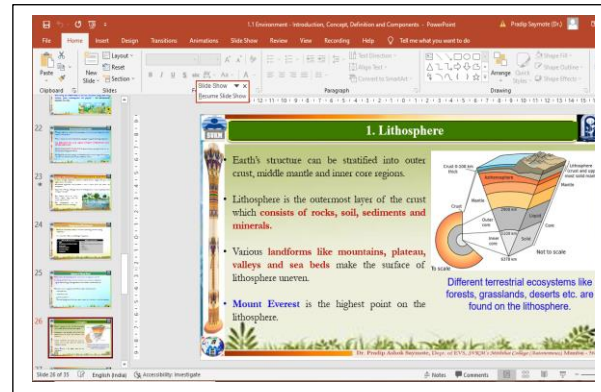

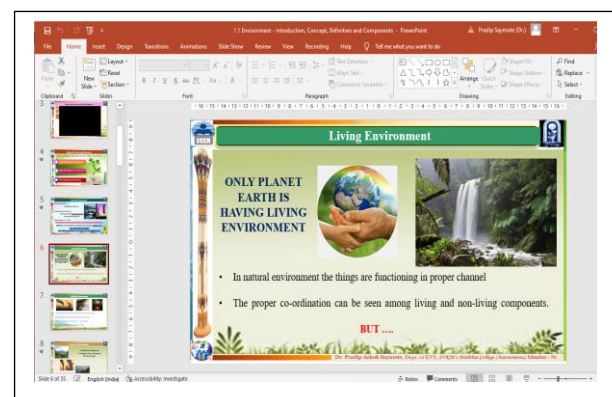

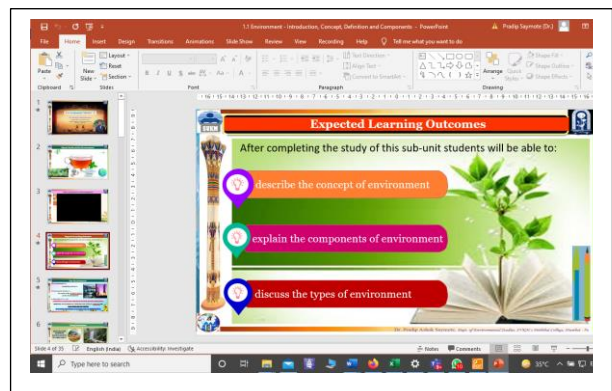

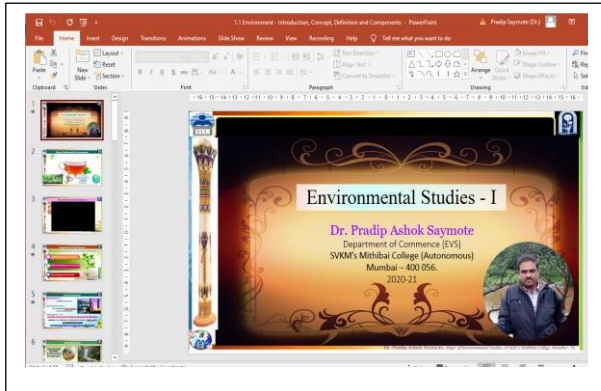

**INSTRUCTIONS**

- Click on the 'Absorbance' button.
- Click the down arrow to set the value 650 nm.
- Click 'Enter' button.
- Click on the lid to remove it.
- Drag and drop the blank cuvette into the cuvette slot.
- Click on the 'Blank' button.
- Click on the blank cuvette to remove it from the cuvette slot.
- Drag the cuvette, containing sample, into the cuvette slot.
- Click on the 'Sample' button.
- Click on the 'Help' icon for more help.
